Alumagrips Beretta 92FS Stocks

With a reputation for reliability earned by serving in the hands of law enforcement agencies for decades, the Beretta 92-series pistol is one rugged sidearm. But if you want to make your 92FS even tougher, consider replacement stocks from Alumagrips. The stocks are CNC-machined from aircraft-grade aluminum and come with a black, olive-gray or clear anodized finish. They are available with a smooth or checkered surface, and you can have them custom-engraved with a logo, an image or your initials. Alumagrips also makes stocks for other pistols such as full-size 1911s, SIG Sauer P238s and Springfield Armory's EMP. Contact Alumagrips: (602) 294-2390; www.alumagrips.com

Blade-Tech Industries Phantom Series IWB Holster

When selecting a concealed-carry holster, many shooters mistakenly choose cost over quality. Blade-Tech's Phantom Series IWB holster is designed for those CCW-permit holders seeking a quality holster that won't tax the increasingly strained ammo budget. Durable Kydex construction coupled with a thin profile make the Phantom rugged, yet slender enough to reduce printing against clothing. Its positive-lock trigger guard and dual tension screws provide enhanced security. The loops can be adjusted for belt width, and the wearer can modify holster cant. The Phantom is available in stealth black for select Glock pistols. Contact Blade-Tech Industries: (253) 655-8059; www.blade-tech.com

Champion Shooting Glasses

Whether you're a SWAT point man or a passionate plinker, the need for quality eye protection is paramount. Champion offers a balanced blend of effective, comfortable and stylish shooting glasses designed to protect your peepers. The wraparound-style frames

come in a variety of colors and feature image-enhancing, scratch-resistant lenses available in clear, yellow, orange and smoke tints. Best of all, they meet military impact-protection standards while blocking 99.9 percent of harmful UVA/UVB rays. Will they make you a better shooter? Maybe not, but you'll look like a pro. Contact Champion: (800) 635-7656; www.championtarget.com

Pachmayr Tactical Grip Glove

When it comes to defensive pistol-craft, proper handgun grip is critical. Custom-molded for a variety of top-selling handguns, Pachmayr's grip gloves are made from the company's Decelerator material, which reduces felt recoil while improving controllability. The frontstrap is grooved to help with finger placement, while the added purchase of the ventilated side panels makes your draw-stroke feel smoother and more instinctive. Contact Pachmayr: (800) 225-9626; www.pachmayr.com

ATI Remington 7600 Tactical Buttstock

Put this stock kit on your Model 7600 and transform it into an M4—well, almost. You'll still have to rack the slide to reload after each shot, and the stock won't change the chambering, but you do get black rifle ergonomics at a fraction of what an AR would cost. Made from glass-reinforced polymer, the six-position, M4-style stock has a pebble-grain pistol grip for improved purchase and comes with a removable buttpad. It interfaces directly with the receiver, so no fitting is required. The stock also fits 760, 7615, 740 and 7400 variants. Contact ATI: (800) 925-2522; www.atigunstocks.com
