ATI Adjustable Hunting Stock

Advanced Technology International (ATI) has developed shotgun stocks and fore-ends that transition guns into universal and versatile hunting tools. The stock adjusts in four positions from 12³/₈"-14³/₈" with one easy push of a button, making the adjustment quick for shortening length of pull to accommodate youth shooters or extra clothing worn during winter months. The incorporated neoprene cheek rest and recoil-reducing butt pad with non-slip surface offer added comfort, and the interchangeable grips allow for personal preferences, as does the ergonomically tailored fore-end with non-slip grip. The DuPont-reinforced polymer stock and fore-end fit 12- and 20-ga. Remington 870, Maverick 88, Winchester 1200/1300, and Mossberg 500/590 models. Both stock and fore-end are weatherproof, offer a limited lifetime warranty, and are available in matte black, camouflage, and ATI's exclusive DyeHard camo finishes. www.ATIgunstocks.com

Radians Interchangeable Lens Kit

Radians' economical Remington package, T-85 Interchangeable Lens Kit, provides indoor or outdoor shooters with five lens tints. The clear lens permits maximum visible light transmission indoors where impact protection is required; smoke is best on bright, sunny days for glare reduction; orange enhances targets; amber offers increased visibility in haze and fog; and copper gives more contrast and depth perception in sunlight. The lens kit (\$29.99) combines comfort, ease, and convenience. The rubber nose piece, adjustable temple length, and rubber temple pads afford a comfortable and customized fit. Accessories include neoprene carrying case, handy neck cord, and soft, micro-fiber cloth bag for easy cleaning or storage. (877) 723-4267; www.radians.com

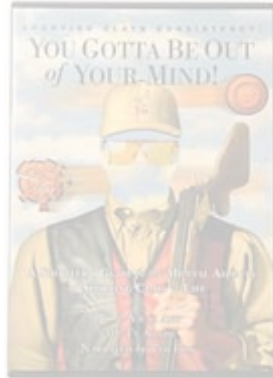

RIG Gun Care Products

Birchwood Casey's new RIG Universal Gun Grease has been protecting firearms for years, now available in 3- and 12-oz. jars (\$7.90 and \$15.80), in addition to the traditional 1¹/₂-oz. tube (\$5.20). The anti-galling RIG + P Stainless Steel Lube and preservative (\$5.80) also comes in a 1¹/₂-oz. tube. The perennial favorite, the RIG Rag (\$10.50) is also available in the same sheepskin applicator, already coated and pre-treated with Universal Gun Grease. (800) 328-6156; www.birchwoodcasey.com

OSP Audio Book

OSP shooting instructors Gil and Vicki Ash's audio book is a shooter's guide keyed to the mental aspects of sporting clays narrated by two-time Country Music Award winner Tim Fox. More than five hours long, *You Gotta Be Out of Your Mind* is divided into five CDs that let you learn while driving or completing tasks. The Ashs' system empowers shooters to tailor the concepts to their individual levels, allowing them to self-coach with effectiveness and improve their results. OSP's common-sense teaching helps students understand how their eyes, mind, and body function together—powerful insight that can be applied to all aspects of personal life and business, making you a better performer at everything you do. Flex-Hone Tool For Firearms

Give the metal surfaces of firearms a beautiful finish free of microscopic imperfections that affect performance with the Flex-Hone tool. The ball-style tool features small, abrasive globules mounted to flexible filaments that produce the optimum finish in any type or size cylinder, slide, chamber, magazine tube, or barrel. The finish reduces surface tension by removing stressed areas, and valleys produced improve surface's ability to hold oil, promoting smoother ejection. Used in any hand drill or rotating spindle, the tool is self-centering and self-aligning to the bore. Safely and thoroughly clean damage from oxidation and corrosion, blend scratches, and remove nicks and pits that cause plastic adhesion. A barrel hone can produce a smooth finish that prevents plastic from building up as quickly, resulting in greater accuracy, reduced wear, and longer life. (323) 261-2193; www.brushresearch.com
